

NOTICE

Intent to inform third-party employees of possible pesticide-contaminated equipment while working at this business. The EPA defines third-party employees as any individual performing a service who is not directly employed by this business.

Anything you come in contact with may be contaminated with pesticides.

The potentially harmful effects of exposure to pesticides:

- Can induce a range of possible symptoms and outcomes including “nothing” to “you could die.”

When handling application equipment, limit exposure to pesticide residues by:

- Wearing waterproof gloves.
- Wearing additional PPE as needed, for example, safety glasses, coveralls, and rubber boots.

Follow these personal hygiene practices and decontamination procedures for preventing pesticide exposures and removing pesticide residues:

- Wash your hands before eating, drinking, smoking, or using the toilet.
- Since clothing may become contaminated, wash it separately from other clothing.
- Leave work boots outside.

MP-137

December 2018

Issued in furtherance of extension work, acts of May 8 and June 30, 1914, in cooperation with the U.S. Department of Agriculture. Bret Hess, interim director, University of Wyoming Extension, University of Wyoming, Laramie, Wyoming 82071. The University of Wyoming is an affirmative action/equal opportunity employer and institution and does not discriminate on the basis of race, color, religion, sex, national origin, disability, age, veteran status, sexual orientation, or political belief in any aspect of employment or services. The institution's educational programs, activities, and services offered to students and/or employees are administered on a nondiscriminatory basis subject to the provisions of all civil rights laws and statutes. Evidence of practices that are not consistent with this policy should be reported to the Employment Practices Office at (307) 766-6721.
