Spring, 2022

We do not have anyone available to help with horticulture, lawns, trees, and gardens in Washakie County. Here are some other ways to get your questions answered:

1. Browse the publications in our office at 1200 Culbertson Ave, Ste G.
2. Visit the horticulture page on the Washakie County Extension website:
    https://uwyoextension.org/washakiecounty/aghort/
3. Bring your insect or plant disease specimens to the Extension Office and our administrative assistant may be able to send them to the UW Extension diagnostics team.
4. Search for online resources through UW Extension:
    a. UW Extension publications: https://www.wyoextension.org/publications/
    b. Barnyards and Backyards magazine and resources page:
        https://www.uwyo.edu/barnbackyard/resources/
    c. Barnyards and Backyards Live! recordings: https://www.uwyo.edu/barnbackyard/live/
    d. Wyoming Native Gardens: https://wyomingnativegardens.org/
    e. Master Gardener classes: http://www.uwyo.edu/mastergardener/
    f. Online classes from UW Extension on a range of topics:
        https://extension.catalog.instructure.com/
    g. UW Extension YouTube channel - hundreds of videos on horticulture and garden topics:
        https://www.youtube.com/c/UWyoExtension

5. Use the internet. Here are some suggestions to get accurate and science-based information:
    a. Use the Ask Extension website: https://ask2.extension.org/kb/index.php
    b. Add the words "extension" or ".edu" to your search phrase.
    c. When looking for plant diseases symptoms use the "google image search" function.

Please consider participating in the "Grow a Little Extra" campaign through the Wyoming Hunger Initiative. Plant a few extra rows and bring your extra produce to your local Extension office to be shared with families in your community. https://www.nohungerwyo.org/grow

Regards,

Caitlin Youngquist
